Profile

Versatile and highly skilled developer with over 6 years of professional experience. I'm committed to excellence, innovation, and crafting engaging digital experiences. My passion for staying abreast of industry advancements drives my continuous learning and integration of new technologies into my work, leveraging a strong background in design to create seamless and visually appealing user interfaces.

Work

ON - Developer
July 2021 - current

- Lead the development of a responsive, multi-language shared accommodation website called "The-Bon". For this client I made the decision to use a headless CMS to enable the client to self-serve their content across languages. while doing this I lead the project with multiple junior developers who I mentored through out this project, while being able to deliver it ahead of schedule.
- We managed multiple estates or different clients, these ranged across technology stacks, one of my primary responsibilities was to support the team across these estates day to day and deliver larger features for clients. These ranged from things like PHP to Javascript/Typescript and from different frame works such as astro and Next JS, and an array of other technologies.
- Collaborated with internal and external teams, including design, to provide guidance on UX and ensure high-quality user experiences new features and experiences. Additionally, worked closely with management teams to provide technical support for tasks such as website performance enhancements, SEO improvements, and assessing new business initiatives.

Efterklang [Band] (Freelance Project)
May 2021

- Developed with Efterklang an interactive application around the new album release where they wanted a digital experience for their fans, working with them I developed a unique photo sharing experience to share images and access an unreleased song.
- For this project I was the solve developer, this led me to choose Google Firebase, Google Cloud Buckets and React to allow participants to upload and share images and stream music back to the participants.

UAL - Web Developer
Mar 2020 - July 2021

- Collaborated with the UX team to develop high-quality responsive UIs for UAL's rebrand, adhering to responsive and accessible design patterns.
- Led the migration of UAL's job opportunities site, transferring the CMS to WordPress and implementing Frontity's React framework.
- Developed a Rest API to manager users and their vacations.

Fluid/Soundings - Web Developer
Oct 2018 - Mar 2020

- Developed and maintained websites for clients such as, TFL, the Collective, and The Hong Kong & Shanghai Hotels.
- Handled communication with the stake holders, internal teams and client's developer teams while ensuring successful delivery of projects with challenging deadlines.
- For a public portfolio of the company's projects I created an interactive map that allow the user to navigate across London interacting with our physical projects in London in a digital space.
